

Liquids Rule

Watch Video At: <https://youtu.be/qwi6XzjB00I>

You are allowed to bring a quart-sized bag of liquids, aerosols, gels, creams and pastes in your carry-on bag and through the checkpoint. These are limited to travel-sized containers that are 3.4 ounces (100 milliliters) or less per item. Placing these items in the small bag and separating from your carry-on baggage facilitates the screening process. Pack items that are in containers larger than 3.4 ounces or 100 milliliters in checked baggage.

Any liquid, aerosol, gel, cream or paste that alarms during screening will require additional screening.

Carry-On Bag

3.4 ounces (100 ml) or smaller sized containers that fit in 1 quart-sized, resealable bag may go in carry-on and through checkpoint security.

Checked Bag

Containers that are larger than 3.4 ounces (100ml) regardless of amount inside must be in checked baggage.

Exemptions

- Medications
- Infant and child nourishments

Inbound International Flights

You may carry duty free liquids in secure, tamper-evident bags, more than 3.4 oz or 100 ml in your carry-on bag if:

- The duty free liquids were purchased internationally and you are traveling to the United States with a connecting flight.
- The liquids are packed in a transparent, secure, tamper-evident bag by the retailer and do not show signs of tampering when presented to TSA for screening.
- The original receipt for the liquids is present and the purchase was made within 48 hours.

The items inside the secure, tamper-evident bags must be screened and cleared. Any item that alarms or is unable to be screened will not be permitted in your carry-on bag. We recommend packing all liquids, gels, and aerosols that are over 3.4 oz or 100 ml in your checked baggage, even if they are in a secure, tamper-evident bag.

Liquids more than 3.4 oz or 100 ml not in a secure, tamper-evident bag must be packed in checked baggage.
